VOL. 8 NO. 37 | Lancaster Farming, Saturday, August 17, 1963 | $2 Per Year

STATE CHAMPION 4-H POULTRY JUDGING TEAM pose upon their return to the county from The Pennsylvania State University this week. They are, left to right, Jay Hess, Manheim R3; Albert Henry, New Providence R1; Gary Porter, Washington Boro R1; Robert Henry, New Providence R1, and Winthrop Merriam, associate County Agent, who coached the team. L. F. Photo.

Two 4-H Judging Teams Win Blue Ribbon Awards

Two 4-H judging teams returned to Lancaster county Wednesday with first place blue ribbons and plaques won in competition at Pennsylvania 4-H Club Days at the Pennsylvania State University.

With wins in dairy and poultry judging, Lancaster County was the only double winner in the state.

The poultry team, repeating last year's championship performance, beat West Moreland County for the top prize

The team was composed of J. Kenneth Hess, Manheim R3, Gary Porter, Washington Boro R1; and twins Albert and Robert Henry, New Provdence R1.

The dairy judging team surpassed 43 other teams in the largest class of competition Second was Blair County, while Chester finished third.

Elvin Shelly, eighteen, Manheim R1, boosted the teams effort with a second place individual finish. Others on the team were Roy Breneman, Willow Street R 1; Donald Bollinger, Manheim R1 and Kenneth Rutt, Quarryville R1.

York County, which makes a habit of top livestok teams, again took the first place laurels with Lancaster a close second. Eugene Hosler, Manheim R3, was the county's high finisher in fifth place Nineteen teams entered the event to make it the third argest of the day

Jay Lehman, Holtwood R1, fifteen-year-old forestry demonstrator, was high scorer in the event and captured a blue ribbon in the Danish system and a first place medal.

Falling from last year's first place showing, the swine judging team tied for third with Adams County.

Dairy Sets Maximum Butterfat Limit On Producers Milk Test

Patrons of the Elizabethville Dairy, Sunnydale Farms, Inc., have been notified that the dairy will not accept milk with more than 3.8 per cent butterfat test.

In a letter sent to all patrons, the dairy said, in part, "Due to the present set up of the Federal Marketing Order, we are compelled to limit our purchasing of milk only so far as butterfat content is concerned — due to the uneconomical financial arrangements under the present marketing order, we sincerely regret that we must institute the following restrictions which shall remain in effect until further notice."

In a letter dated March 21, 1963, the dairy set the maximum butterfat at 4.0. A letter dated June 1, set forth the following restrictions:

"Beginning August 1, 1963, we will not accept any milk from patrons whose milk tested 3.8% or higher during the month of June 1963 On Sept. 1, 1963, we will not accept milk from those patrons whose milk tested 3 85 or higher during the month of July 1963 — Any patron shipping milk of 3.8% or higher in any month will not be able to ship us beyond 30 days after the month in which his milk tested 3.8% or higher."

The letter was signed by Stanley Eisenberg for Sunnydale Farms, Inc.

Farm Calendar

Guernsey Men Plan Field Day

The Annual Field Day of the Lancaster County Guernsey Breeders' Association will be held at the farm of Mr. and Mrs L. E Shoemaker and Sons, Kirkwood, Pennsylvania, on Friday, August 23.

Judging will begin promptly at 10:00 a. m. There will be three classes of cattle to judge; aged cow, two years old, and heifer. Prizes will be awarded.

Roger L. Strack, a young man very much interested in the Guernsey Breed, will act in capacity of judge and speaker. He is employed by Eastern States Farmers' Exchange and was former herdsman at Lauxmont Farm.

Field Day Committee Chairmen, Richard Maule suggests dairymen take route 472 out of Quarryville and follow the signs to Shoemaker's farm Box lunch will be served by the ladies of the Union Church.

New York 4-H Members Visit In The County

Twenty-six 4-H club members and leaders from Onondaga County, New York, are in the county this week end returning the exchange visit to local 4-H club members who went to the Empire state community last winter.

The 22 young people and their four adult leaders arrived in the county on Thursday and plan to leave for home on Sunday afternoon.

Their schedule includes tours of Armstrong Cork Company, Hershey Chocolate Factory, and the Amish farm section of the county. Saturday night's pro-

Three County 4-H Youths Awarded Keystone Honors

Three county youths were awarded the coveted Keystone Award for outstanding 4-H achievement at ceremonies this week during Pennsylvania 4-H Club Day on the Penn State University Campus.

Honored for leadership and achievement was Donald Trimble, 21, Quarryville R1. David Denlinger, 17, son of Mr. and Mrs. Paul L. Denlinger, 90 Greenfield Road, was honored for Agriculture, and Miss Cynthia Bucher, 17, daughter of Mr. and Mrs Willis Bucher, Lititz R2, won the honor for Home Economics.

Trimble, who completed active club membership last year, coached the first place county dairy judging team in the state

4-H Pig Show Is Next Week

The annual Lancaster County 4-H Market Hog Show & Sale will be held at the Lancaster Union Stock Yards, Wednesday, August 21, 1963.

The Show will get underway at 8.00 A.M. when 160 hogs from nine Lancaster County 4-H Community Hog Clubs will be judged by breed in three weight classes by Tony Dobrosky, York County Apent.

There will be judging in lightweight (under 190 lbs), medium weight (190-220 lbs) and heavyweight (over 220 lbs) classes.

At 1.30 p.m. approximately 160 hogs will be auctioned to the highest bidder. Claude Smith will call the sale.

The Committee for the Livestock Exchange and the Union Stock Yard Co., sponsors of the show and sale consists of Horace Plank, Chairman; Norman Barley, John Stoudt, John Beam, Issac Groff and Walter Dunlap, Jr., Sec. of the Exchange. Victor Plastow, Asst. County Agent, will represent the Extension Service Office.

County Plowman Finishes Eighth

Lancaster County's plowing champion finished in eighth place in the state matches Thursday.

Frank N. Kocevar, Harrisburg R1, last year's champion retained his crown in the contour division of the tilt. Level land competition trophy went to J. R. Mummert, a nineteen year old Chambersburg farmer.

Richard Groff, Lititz R3, who took the Lancaster County championship last month, ran into some early difficulty by driving toward a boundry stake that had been moved and later had some trouble with a ditch in his plot. Lancaster County finished ninth in last year's state contest.

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average 2 to 6 degrees below the normal range of 62 at night to 83 in the afternoon. A slow rising trend in day to day temperatures at the beginning of the period will be followed by cooler about Sunday night Milder about next Wednesday. Precipitation may total more than 0.6 inch as showers develop late Saturday.

Prices Up 1.5 Cents

Live broiler prices edged up fractionally as a large volume crossed the block at the August 15 auction in the Lancaster Poultry Center.

A total of 164,000 broilers in 32 lots changed hands at prices ranging from 15.8 to 16.3 for a sale average of 16.01.

Four lots of pullets including 6,700 head sold at 17.7 to 18.4, and one lot of 800 leghorn fowl brought 9.6.

The complete sale offered 177,080 head in 39 lots and sold 171,580 head in 37 lots.

Following is the complete sale report with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price.

Slightly Lower Prices Reported

Delmarva reported slightly lower prices on live broilers during the 24 hour period ending 10.30 Friday morning. Prices of 14 9 to 16.5 were reported at farms for 1,058,900 head including 465,700 head sold at Thursday's Eastern Shore Poultry Growers Exchange.

Estimated slaughter for the week end was 869,000 head compared to the 898,000 head last week end.

The Delmarva broiler-feed ratio for the week ending August 9 was 3.0 compared to the 2.9 for the previous week. Broilers averaged 15.11 per pound and mash cost the grower $102 34 per ton. The ratio for the comparable week a year earlier was 3.5 when broilers brought 16.35 and mash cost $93.31 per ton.

From Where We Stand . . .

The Fat's In The Fire

The fat is in the fire!

This old saying pretty well sums up the situation with at least one dairy in the state.

Sunnydale Farms, Inc. of Elizabethville has put a maximum — that's right, maximum — butterfat limit on the milk coming into the plant.

One county dairyman said recently, "We have been culling our heard for years and following a rigid breeding program to try to get our cows to produce higher testing milk, and now it looks like all that effort was in vain."

He went on to explain that his milk had to have a certain "minimum" butterfat content before the dairy would pay a bonus There was never any talk about a maximum test. In fact many dairies suggested that farmers put on a few cows of the color breeds in order to bring the test up.

While this appears to be a purely local situation with only one dairy thus far, we believe it does point up a trend toward lower fats in food, which is a current fad throughout the country.

At least two dairies in the county said this week they have no maximum limits on butterfat test at present and have no plans to impose any such limits in the forseeable future Spokesman for both the local milk plants indicated that there is still a market for high quality milk, and it appears that the demand for this type of milk will continue.

In fact there is some feeling among dairymen that the demand for high testing milk may increase if and when the use of total solids testing becomes widespread.

We do not believe the fact that one dairy set arbitrary butterfat limitations on its producers is any cause for great alarm in the dairy industry, but we do believe it is another indicator of the trend toward blander and more mild flavored foods of all kinds. We also are quick to point out that the diet habits of the American consumer are regulated greatly by fads and notions, and the fickle public taste may very soon be demanding a richer, more satisfying substance in that glass of milk at the dinner table.

While we do not advocate a complete scrambling of our present method of evaluating milk and dairy animals, we do believe that the record keepers, dairy herd improvement associations, and breeders would do well to put less emphasis on the butterfat produced and more emphasis on the total nutrients produced. We believe little good can come from striving to produce more of a product that is in excess supply and in a declining demand situation.

While we realize that butterfat and total nutrients in milk are very closely related, we believe more good would come to the dairy industry if more emphasis were placed on some criteria other than butterfat.

The trend toward less fat in foods does exist. Burying our heads in the sand and pretending that it does not exist will not make the trend go away. We might as well admit that the trend does exist and then try to do something to meet the demand.

At least that's how it looks from where we stand.

★ ★ ★ ★

The Garden Spot

We came back to the Garden Spot after a week of camping in the Pennsylvania mountains with a new appreciation of the advantages of farming in Lancaster County.

When we looked at the little mountainside patches of corn and oats, and the hillside pastures with great rock ledges outcropping over most of the surface, we couldn't help thinking how much easier the jobs of plowing, planting and harvesting are in this beautiful area.

But the thing that brought the problem to us most vividly was the number of little vegetable patches near the houses. Even though the gardens were in very close range of the houses, each one had a high fence around it. By "high" we mean something over eight feet.

Not only do the farmers in the mountain areas have to fight a hostile topography and climate, they have to protect their crops from the deer which are so abundant in much of the state. They are beautiful creatures, but we hope Lancaster County farmers never find out how destructive a large deer herd can be in a field of carefully tended crop.

At least that's how it looks from where we stand.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Test of Faith

Lesson for August 18, 1963

Bible Material: Genesis 21 through 25.
Devotional Reading: Lamentations 3:55-58.

ONE of the strangest stories anywhere is the story of Abraham preparing to kill his only son Isaac and offer the dead body as a burnt offering to God. The deeper question is one which we shall not pursue here: Can we believe that the God whom Christ revealed to us would for any reason command murder of this sort? Or if He did not really mean it, what kind of God would perpetrate such a cruel joke? Many Christians, when they stop to think about this, find themselves in a terrible dilemma; and so they take refuge in calling the story a kind of parable rather than literal fact.

Dr. Foreman

A believing man's conviction

Let us come down to a more manageable, even if still difficult problem. Let us think about the state of Abraham's mind. This good man had a conviction that the same God who had promised him a son was now commanding him to sacrifice that son just as (in those days) a bull or a cow would have been sacrificed, by knife and fire, a burnt offering in honor of God. The difficulty is now not theological but psychological. How could a good man believe such a thing? If a good man today were caught making an attack with a deadly weapon on his own son, and if he told the police to leave him alone, because "God ordered me to do this," the police would turn him over to a psychiatrist. For today any man who would explain a killing he was about to commit, on the ground that this was God's will, would be regarded as obviously insane.

The answer to that is fairly easy if we imagine ourselves back in Abraham's time and place. Child-sacrifice, human sacrifice, was common, as the Bible and archaeology testify. Indeed, Abraham's neighbors might easily have jeered at him for having a cheap religion because he had not sacrificed his son. Anyhow, Abraham lived at a time when such an idea as God's commanding him to sacrifice Isaac could not be brushed off (as it would by any sane man today) as a crazy notion. He really believed that was what his God wanted.

A believer's conscience

Abraham lost no time doing what he firmly believed to be God's command. Now a great many people have consciences they do not use. "You ought" or "You ought not" are only little buzzing static in the mind, fainter and fainter as time goes on and the person pays less and less attention to what his conscience is trying to say. The good man listens to his conscience; his convictions appear in his actions. He is not fond of saying "I know I ought to, but . . ." If he knows or believes he ought to, he acts accordingly. We can call this conscientiousness, but we can call it also obedience. So far as the voice of conscience is the voice of God, following the conscience is obeying the voice of God. It is true, as history shows us, that a man may think an action is good which future centuries will mark down as evil.

A believer's crown

This strange story ends with God saying, "I will bless you . . . because you have obeyed my voice." The story brings out the point that sacrificing his only son was the last thing Abraham wanted to do. It is easy enough to do what is right when that suits our convenience; but when what I want and what I ought to do are not the same thing, then it's another story. Abraham has been honored around the world ever since, because he was one man for whom the number one question always was: Is this the will of God?

Does a believing man have any reward except a kind of satisfaction in having done the right thing? Yes, he may have the reward Abraham had. Every man has even in this life some particular rewards for at least some of the good he has done; and these rewards are not all the same. Abraham was given the promise of a nation descended from him, and of being a blessing to all mankind. This could not come to every one! But isn't it likely that the best reward he could possibly have was that God approved of him? To be "approved unto God" is the brightest crown a servant and friend of God can wear.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service.)

Two Dairymen Are Honored By Nat'l Group

Two Lancaster County Holstein breeders have qualified for the Progressive Breeders' Award — the highest recognition attainable by a breeder of Registered Holstein cattle

Arthur K and Mary D Wenger, Manheim R2, and John E. Kreider, 523 Willow Road, Lancaster, have been notified of the awards

The Holstein-Friesian Association of America has accorded this honor to only 542 Holstein breeding establishments, including 59 in Pennsylvania. This is the second time that both breeders have been so recognized.

To qualify for the Progressive Breeders' Award, a Holstein breeder must meet strict requirements in all phases of dairy cattle breeding and management, including production, type improvement, herd health and the development of home-bred animals.

The Wenger herd completed its latest Dairy Herd Improvement Registry testing year with a lactation average — calculated on a two milkings a day, 305 day mature equivalent basis — on 28 individual records of 14,338 lbs of milk and 567 lbs of butterfat.

The herd has been officially classified for type with a breed age average of 101 2 percent — obtained by dividing the classification score of each cow by the average score of all Registered Holstein cows, of the same age

The Kreider herd completed its latest Herd Improvement Registry testing year with a lactation average — calculated on a two milkings a day, 305 day mature equivalent basis — on 26 individual records of 14,534 lbs. of milk and 550 lbs. of butterfat

The herd has also been officially classified for type with a bread age average of 101.0 percent — obtained by dividing the classification score of each cow by the average score of all Registered Holstein cows of the same age

A bronze year plate will be presented to them at a meeting of Holstein breeders from the area, to be added to the bronze plaque awarded when this herd first achieved the honor.

Begin With Books

Books can help a child expand his world and offer him the challenge of discovery, believes Mrs. Marguerite Duvall, Penn State extension specialist in child development. As he investigates books, he opens up one way to learn about himself, other people, and the world A child's first formal education can begin with books.

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To Apply For Gas Tax Refund

Farmers may apply for a refund of federal tax on gasoline used on a farm for farming purposes The refund will be 4 cents per gallon and the deadline for making the request is September 30th. Form No. 2240 is available at the Internal Revenue Office or from the County Extension Office.

To Control Potato Sprouting

The use of MH-30 on green potato vines 4 to 6 weeks before digging will prevent the growth of sprouts for at least 6 months in storage. The amount of material is 3 to 4 quart per acre along with 50 to 100 gallon of water This spray application is strongly recommended for potatoes that are to be stored for chipping purposes. Do not use MH-30 on seed potatoes.

To Control Weeds In August Seedings

Many summer seedings of alfalfa are damaged by heavy weed growth; these weeds not only compete for soil nutrients and moisture but crowd and shade the small alfalfa plants The use of 2,4-D, B at the rate of one quart per acre when the weeds are not more than one to two inches high is a good practice It is very important to do this spraying when the weeds are small and can be killed by this small amount of the chemical.

To Acclimate Dairy Heifers

Several weeks before freshening time the first-calf heifer should be put with the milking string of cows and handled every day. This will get her quited down and accustomed to the routine of milking activities. This special attention also provides the chance to feed her additional grain and prepare her for the first lactation.

Life is a lot like a grindstone — it grinds some people down, and polishes others up.

County FFA Holds Barbecue

Manor Chapter Future Farmers won the second consecutive county FFA. county softball championship Wednesday night at the annual chicken barbecue sponsored by the county FFA association.

The barbecue, sponsored by the county organization, was planned and arrangements made by the Donegal and Elizabethtown chapters.

Approximately 145 future farmers, representing all the 10 chapters in the county, saw the Minor team,, winners of the northern division, beat the southern division champions, Solanco, by a score of 12 to 3.

After the final playoff round, the southern division all-stars beat the stars from the northern section by the score of 7 to 1.

The first annual barbecue was held last year at Quarryville.

Boots & Saddles Hold Meeting

By: Susanne Hottenstein

The regular monthly meeting of the Boots and Saddles 4-H club was held on August 9, at the Reamstown Memorial Park, beginning at 7.30 with games. Candy Fichthorn showed us her display illustrating the anatomy, main blood vessels, and skeleton of the horse. Barry Kulp showed the proper way to curry and groom horses for roundup.

The two day trail ride was discussed. It will be August 24 and 25. Members are to meet at the Willow Street Diner at 10 00 A M The cost will be $1.00.

The next meeting will be on September 13 at 7 30 Following adjournment the members roasted hot dogs and ate other refreshments.

● New York 4-H

(Continued from Page 1)

gram will include a square dance and ice cream party at the home of Mr. and Mrs Clyde Wivell, Columbia R1

The exchange has been planned by the county 4-H council.

● Fulton Grange

(Continued from Page 1)

Jr , Mr and Mrs. Ambrose Giffing, Lynda Schonvisky, Richard Hash, Cathy Gilbert and Clair Murphy; Vocal quartette composed of Mrs Theodore Beck, Mrs. Charles McSparran, Gyles Brown and Robert Reed.

There was an art exhibit, part of which will be entered in the art contest at the Pomona Grange.

At the next meeting, August 26, the 4H Clubs will present the program.

"Hitch Your Silo Filler To A Star"

Weaver Star Silo Co.

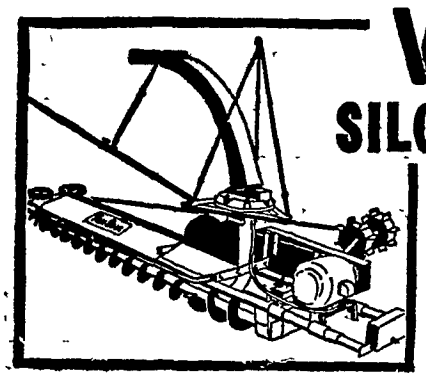
R#5, Lebanon, Pa.

CR 2-7424

Poured Concrete Silos - Grain & Industrial Bins

Complete automatic feeding for DAIRY COWS and CATTLE!

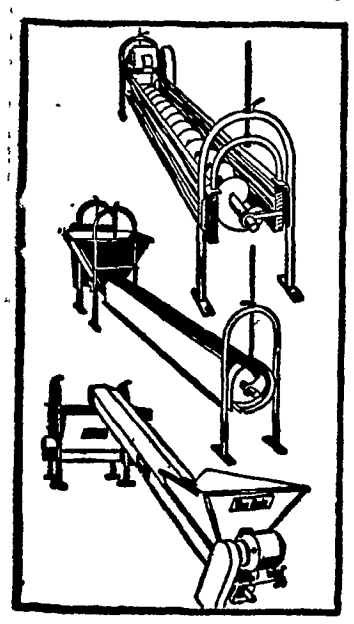
VanDale SILO UNLOADERS



Double augers deliver more silage per minute even when silage is deeply frozen . . . and at a lower operating cost. Patented V-paddle impellers *throw* . . . not blow . . . silage down chute. Adjustable drive hubs give positive traction in all types of silage.

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 10', high capacity 9" auger. Additional auger sections are in 10' units and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 9" auger rotates within tube. Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 10', 9" auger. Additional 10' auger sections may be added.

Now, 10% More Milk

Dairymen everywhere are talking about Ful-O-Pep Cattle-izer Dairy Feed—the biggest breakthrough in dairy cattle nutrition in this century. In herd after herd, the story is the same: *more milk on the same amount of feed.*

Based on an entirely new principle in ruminant nutrition, Ful-O-Pep Cattle-izer Dairy produces up to 20% more usable energy than regular Super Milking Feed. And records show this extra energy results in an average of 10% more milk after only 4 weeks on feed.

What would 10% more milk mean for your profits?

For the Farm Wife and Family

Summer Delicacies

By Mrs. Richard C. Spence

If your family feels that a meal just isn't complete without dessert, here's a Versatile Custard Sauce you'll find indispensable. It's a handy helper for whipping up a host of different desserts in a hurry.

Try this smooth, velvety Custard Sause over apple dumplings, fruit crisps, unfrosted cake, and all kinds of canned and frozen fruit as well as fresh fruit now in season. It's delicious with fresh sliced peaches, blueberries or strawberries; just as good with canned greengage plums or frozen mixed fruits. Still another tempting variation might team this versatile sauce with molded or cubed gelatin. The creamy sauce adds flavor and gives your desserts extra nutritional value, too, since it's made with instant nonfat dry milk. Busy homemakers will be happy to know that this Versatile Custard Sause is easy to make. Only one heavy saucepan is used in the entire cooking process, and in minutes you have a smooth, easy-pouring sauce. Serve it warm or chilled. You can keep the sauce refrigerated for several days, ready to be spooned over a tempting variety of light, luscious desserts.

* * *

VERSATILE CUSTARD SAUCE

1 cup instant nonfat dry milk
¼ teaspoon salt
¼ cup sugar
1 teaspoon cornstarch
½ cup cold water
1 egg
2 egg yolks
1½ cups hot water
1 teaspoon vanilla

In a heavy saucepan, mix together nonfat dry milk, salt, sugar and cornstarch. Add cold water, egg and egg yolks; mix until smooth. Gradually pour in hot water. Place over low heat and cook, stirring constantly until smooth and mixture coats spoon. Remove from heat; stir in vanilla. Chill.

SERVING SUGGESTIONS:

1. Custard Sauce is good hot or cold on unfrosted cake squares; garnish with various fruits, if desired.

2. Custard Sauce is delicious on apple crisp or dumplings, sprinkled with a dash of nutmeg.

3. Try Custard Sauce over fresh, canned or thawed frozen fruits, or a combination of such.

4. Dress up fresh or canned pineapple chunks with Versatile Custard Sauce. In a saucepan, melt 2 tablespoons butter, stir in 2 tablespoons light brown sugar, until sugar melts. Remove from heat; add 1 teaspoon rum flavoring. Toss in two cups of drained fresh or canned pineapple chunks. Divide into six serving dishes. Pour on chilled Custard Sauce. Top with macaroon crumbs.

* * *

CITRUS CHIFFON

3 medium oranges, peeled, cut into pieces
¼ cup water
1½ envelopes unflavored gelatine
1¼ cups sugar
Dash salt
4 eggs, separated
½ cup fresh lemon juice
½ cup water
2 teaspoons grated lemon peel
½ teaspoon vanilla extract
Whipped cream

Combine orange pieces and ¼ cup water in electric blender. Blend until smooth; set aside. Combine gelatine, ¾ cup sugar and salt in top of double broiler. Beat egg yolks and add with lemon juice and ½ cup water to mixture in double boiler. Cook over boiling water, stirring until gelatine dissolves and mixture thickens, (12 to 14 minutes). Add grated lemon peel, blended orange and vanilla extract. Chill until mixture mounds slightly when dropped from a spoon. Beat egg whites until they stand in soft peaks; gradually beat in ½ cup sugar. Fold into chilled citrus mixture, blending lightly. Carefully spoon gelatine mixture into 2-quart mold. Chill until firm. To serve, unmold and garnish with whipped cream. 8 to 10 servings.

* * *

LOW CALORIE ORANGE-LEMON PARFAITS

2 envelopes low-calorie lemon-flavored gelatin (3 to a package)
2 cups hot water
3 medium oranges, peeled, cut into bite-size pieces, drained
Fresh mint

Dissolve gelatin in hot water. Chill until consistency of unbeaten egg white. Spoon half of gelatin into 6 parfait or sher-

bet, glasses. Chill until firm. Spoon half the drained orange pieces on top of gelatin. Cover with remaining partially set gelatin; chill until firm. Just before serving, top with remaining oranges. Garnish with a sprig of fresh mint. 38 calories in each serving. 6 servings.

* * *

SUGAR POPS LOLLIPOPS

¾ cup brown sugar, firmly packed
¼ cup corn syrup
1 tablespoon butter or margarine
4 cups sugar coated puffed corn
14 4½ inch wooden skewers

Combine sugar, corn syrup and butter in 2-quart saucepan. Cook over moderate heat, stirring constantly, until sugar is dissolved and mixture begins to bubble. Remove from heat. Add cereal, stirring until well-coated with syrup. When cool enough to handle, shape into circles about 2½ inches in diameter and ¾ inch thick. Insert a wooden skewer into each to resemble a lollipop.

NOTE: 1 cup salted peanuts may be substituted for 1 cup of the cereal.

* * *

For a special treat, serve this quick Walnut Coffeecake to your friends at "milk break" time, or to the family for breakfast or brunch. With tall glasses of ice cold milk and plenty of butter, it really hits the spot.

WALNUT COFFEECAKE

¾ cup (1½ sticks) butter
1 cup sugar
1 teaspoon vanilla
2 eggs
2 cups sifted flour
1 teaspoon baking powder
1 teaspoon baking soda
½ teaspoon salt
1 cup dairy sour cream
¼ cup firmly packed light brown sugar
¼ cup sugar
½ teaspoon cinnamon
½ cup chopped walnuts

Cream together butter and 1 cup sugar until light and fluffy. Add eggs one at a time beating well after each addition. Sift together flour, baking powder, baking soda and salt; add to creamed mixture alternately with sour cream beginning and ending with dry ingredients. Spread evenly in pan. Mix together brown sugar, ¼ cup sugar, cinnamon and walnuts, sprinkle over top of batter. Bake 45 to 55 minutes in a 350 degree oven Use a 9 inch square pan, buttered, for this recipe.

* * *

RHUBARB BAKE

2 pounds rhubarb, cut into 1 inch pieces (approx. 2 quarts)
1 to 2 cups sugar, depending on tartness of rhubarb
¼ teaspoon salt
1½ cups dairy sour cream
½ cup firmly packed light brown sugar

In a saucepan place rhubarb with sugar and salt; cover and allow to simmer in own juice, stirring occasionally, until just tender (will cook down to approximately 1 quart). If rhubarb is exceptionally juicy, thicken slightly with tapioca. In casserole, layer in the following order: 2 cups rhubarb sauce, ¾ cup sour cream, and ¼ cup brown sugar; repeat. Bake 12 to 15 minutes in a 350 degree oven. Serve warm or cold. Use a shallow 5 to 6 cup casserole for this recipe. Makes 6 to 8 servings.

THURSTON

Good To Know

Peanuts and peanut butter are valuable additions to standard family fare Their high-quality protein, niacin and other B vitamins, minerals, and rich, flavorful taste make them good eating any time of the day

For a tasty sandwich filling, combine chopped hard-cooked eggs and peanuts with mayonnaise.

Prepare your favorite dumpling mixture, stirring a dried herb, such as basil, parsley or oregano, into the dry ingredients. Drop the dumpling batter into hot soup and simmer until the dumplings are fluffy-tender — about ten minutes. Gives a favorite soup a new flavor.

Guides For Using Color

Color can establish the mood of a room, create excitement, or invite rest.

There is no one rule for the use of color, but some guides include: Try building a color scheme around an existing pattern in a fabric, wallpaper, floor covering, or picture.

Consider the amount and position of natural and artificial light in a room. Notice the exposures of the room and use colors accordingly.

Color repeated throughout a room can contribute to a sense of unity, too many colors in a room will destroy unity.

Use color to create effects, make rooms appear larger, ceilings higher.

Children and Their Jobs

Children cooperate more and perhaps enjoy a task more if they get to pick and choose their jobs. Sometimes it's surprising what jobs they pick — quite different from what their parents would have expected or assigned. But children shouldn't be given jobs beyond their ability Neither should they get ones simply because Mother and Dad don't like to do them A child will realize he's getting a not-so-good job and he'll probably dislike the job and resent the persons who gave it to him.

Some Guides to Lawn Mower Safety

Walk over the lawn and pick up toys, stones, wire, and other debris before each mowing

Don't allow young children to operate a power mower or play near one while it is running

Never leave the mower unattended while it's running

Be conscious of the danger that exists from getting feet or hands under the mower

A self-propelled mower is more dangerous than the hand-propelled type.

* * * *

Good To Know Anytime

Dampened clothes waiting for you to iron invite mildew. So here's how to prevent mildew If you can't iron dampened articles within a few hours after sprinkling them, wrap in plastic and put in the refrigerator They'll stay fresh for several days.

● 4-H Judging

(Continued from Page 1)

Among 19 teams, the county vegetable team was sixth but placed David Denlinger, two-time Keystone Award winner, on the top spot.

Judy Warfel, Conestoga R1, placed second place in flower judging.

Cynthia Bucher, Lititz R2, and Virginia Wivell, Columbia R1, came in with first place in poultry foods demonstration. The Tractor demonstration

(Continued on Page 10)

LANCASTER COUNTY'S 4-H DAIRY JUDGING TEAM returned to the county from Penn State this week with a blue ribbon. They are, left to right, Kenneth Rutt, Quarryville R2; Donald Bollinger, Manheim R1; Elvin Hess, Jr., Strasburg R1, adult leader; Roy Breneman, Wilow Street R1; Elvin Shelly, Manheim R1, and Donald Trimble, Quarryville R1, junior leader and assistant coach of the team. Your steers...

and RED ROSE®

Beef Cattle Supplement

Red Rose Beef Cattle Supplement assures quick gains. It supplies vitamin A and D, and all proteins and minerals that are necessary to balance farm roughages of hay, pasture, grain and corn cobs; and contains urea as a protein extender. For your selection, it is available with or without Diethylstrilbestrol.

If you have steers on your farm — Red Rose Beef Cattle Supplement should be on your next feed order.

DAVID DENLINGER

CYNTHIA BUCHER

DONALD TRIMBLE

● Three County

(Continued from Page 1)

event Tuesday.

He has been a consistent winner in area and state dairy competition with both Brown Swiss and Holstein cattle.

Two years ago he was on the first place state dairy judging team which went on to a fourth place in the national contest in Waterloo, Iowa His club honors include both 4-H and FFA local, state and national citations.

Denlinger, winner of the Keystone Award for the second consecutive year, was first place competitor in the vegetable judging class Tuesday at Penn State He is an officer in both the Garden Spot 4-H Community Club and the Lancaster County 4-H Council.

Miss Bucher, teaming with Virginia Wivell, Columbia R1, captured first place laurels in the poultry foods demonstration Tuesday at Penn State. She is a member of the Lititz-Manheim Flying Fingers Sewing Club and was one of seven winners of the 4-H County Dress Review last August.

In June she was elected president of the Lancaster County Home Economics 4-H Council.

The three are now being considered for the top project honors and the right to represent the state in the National 4-H Congress in November.

'63 Tobacco Crop Prospects Better

HARRISBURG — The Pennsylvania Crop Reporting Service today forecast a 1963 tobacco crop for the state of 50.8 million pounds, slightly above the 1957-61 average of 50 3 million pounds less than last year.

Yield per acre this year is estimated at 1,750 pounds, slightly below last year but above the five-year average.

Frequent local showers in the Lancaster county area have kept tobacco in fair condition. The early crop appears to be in better condition than late plantings, but all need more rain for continued growth

Prices received by Pennsylvania farmers last year averaged 23.5 cents compared to 27 0 cents in 1961.

CHECKERBOARD service bulletin

10 years of research behind Purina Early Weaning Chow

Purina Early Weaning Chow for baby pigs is a highly palatable, highly fortified, highly nutritious feed made for hogmen who plan to wean pigs at three weeks . . . or wish to wean pigs earlier. It may also be used in early weaning of late-farrowed litters, for orphan pigs or undersize pigs at normal weaning age.

In six tests on 616 pigs, Early Weaning Chow-fed pigs gained as fast as pigs on sow's milk and creep feed from the 3rd to 6th week. They gained .77 lb. per pig daily—made 1 lb. gain from only 1.27 lbs. feed.

In on-the-farm tests, pigs followed the same pattern . . . weighed 23-33 lbs. at 6 weeks. Feed cost per pound of gain on good pigs, raised under good management, ranged from 12¢ to 14¢.

JOHN DEERE 110 Lawn and Garden Tractor

Try these outstanding John Deere features

7 h.p. engine sprints you along at more than 6 mph. Rugged engine starts instantly, and responds instantly to all controls.

Ignition key safety start. The "110" must be in "neutral" to be started. If the mower is attached, it, too, must be disengaged.

Independent ground-speed control lever gives you mastery over every job. Select 21 forward and 7 reverse speeds. Make speed changes without using throttle or clutch.

Single pedal does three jobs. Depressed one-third, it becomes a second ground-speed control. Depressed two-thirds, it serves as a clutch for shifting gears. Depressed all the way, it applies double-action braking power to both rear wheels.

Get the feel behind the wheel. Be prepared to fall in love the first time you take the wheel. Everyone does! Drop in soon. Ask about our convenient Credit Plan.

Council Aids in Decisions

A family council gives all members a voice in making decisions on family matters, says Mrs. Marguerite Duvall, Penn State family life specialist. The basic idea of a council recognizes that the family is a group in which each member has rights, responsibilities, and privileges.

Field Day - Aug. 20	Field Day - Aug. 22
1 p.m. at Showroom	1 p.m. at Dealership

Also other hay tools and the 6,000 Ford Tractor will be on demonstration at that time

CONTROLLED ENVIRONMENT!

No Substitute For Good Management

We hear a lot about controlled environment today.
Many Poultrymen think or hope that this is the answer to getting better pullets in the laying house.
No doubt there are many good things to be said for well insulated, windowless houses with controlled ventilation and lighting . . . BUT

It is still the POULTRYMAN Who Must Enforce The Sanitation and the GENERAL MANAGEMENT

Which makes this type of housing work

Controlled environment is good, but not a substitute for MANAGEMENT —

Mr. Poultryman . . .

If you are about to expand or build new housing, you surely should investigate "CONTROLLED ENVIRONMENT", however . . . . In the meantime, DON'T OVERLOOK THE OPPORTUNITIES . . "DIAMONDS" in your own back yard of conventional housing. Controlled environment is only another way of saying:

Good [Controlled] Management

A GOOD Poultryman with fair conventional equipment will out perform a poor poultryman with a gold plated chicken house.
Are you thinking of expanding? Or . . .
Do you want to do a better job with what you have?
In either case we'll be happy to assist you!
Nowhere can you get better feed service or management assistance than at Miller & Bushong.
Remember . . . .
EARLY BIRD FEEDS and GOOD MANAGEMENT
a winning combination for any Poultryman.
